

AI BONE FRACTURE ANALYSIS REPORT

Advanced Deep Learning Diagnostic System

REPORT ID

BFC-20260529-131949

SCAN DATE

29-May-2026 01:19 PM

PATIENT INFORMATION

Patient Name: Harshit

UPLOADED X-RAY SCAN

FRACTURE DETECTED

Confidence: 99.65%

RISK LEVEL

HIGH

CONFIDENCE SCORE

99.65%

DIAGNOSTIC RELIABILITY

★★★★★ EXCELLENT

AI MEDICAL INTERPRETATION

AI Interpretation

The uploaded X-ray demonstrates structural patterns associated with a possible bone fracture.

The AI model identified abnormal bone continuity and fracture-like characteristics.

Professional radiological review is strongly recommended.

MODEL INFORMATION

Model Architecture: ResNet50 Transfer Learning

Framework: TensorFlow / Keras

Input Resolution: 224 x 224

Test Accuracy: 92.73%

DISCLAIMER

This report was generated using an AI-assisted diagnostic model.

It should not be considered a final medical diagnosis.
